DETAILED ACTION

Allowable Subject Matter

Claims 1-9, 22-34 and 39-47 are allowed over the prior art of record in the reply filed 02/13/2008.

The following is an examiner's statement of reasons for allowance: The claims in this application have been allowed because the prior art of record fails to disclose either singly or in combination the claimed power assisted injection method and injector device for delivering a dispersed medicament or diagnostically active agent to a patient. The injector device maintains the homogeneity of the injected agent by active movement of the delivery device. Specific active agents disclosed are gas microbubble suspensions which are useful in ultrasonic diagnostic imaging and liposomal formulations in which liposome vesicles are loaded with iodinated compounds.

The closest prior art of record is Pokras (USPN5,647,851), however these references do not disclose the device as claimed or described above.

Regarding claims 1-2, 39, 41, and 46-47, the closest prior art of record fails to teach among all the limitations or render obvious the method and device of imaging or injection an agent by subjecting the suspension in the syringe to a rotation or rocking motion, thereby maintaining the suspension homogeneous by preventing segregation of the microparticles by gravity or buoyancy, and without damaging the particles or disturbing the distribution, with the rotation or rocking motion not being caused by vibration produced by a motor unconnected to the syringe.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
